Please take a look at this briefing. Linc is summarizing the Cummins strategies for their chassis cert pick ups. This issue just started before you left, but Cummins has finally given Linc some specifics on emissions impacts. We need to compare the **CBI/ Ex. 4** AECD they have here to what we have approved in the past. Can you take a look at slides 7 and 11 and work with Linc to compare this to a similar engine cert strategy. Jason was looking into this while you were gone, we looked through some of the Cummins binders in your office, but really couldn't find what we were looking for.

I'll be out of the office most of the day Monday and Tuesday (at the retreat). Merrylin, Chet and Margo are supposed to meeting about this issue (maybe next week).

Thanks,
Khesha
